Tokens and Objective Markers

Objective Markers

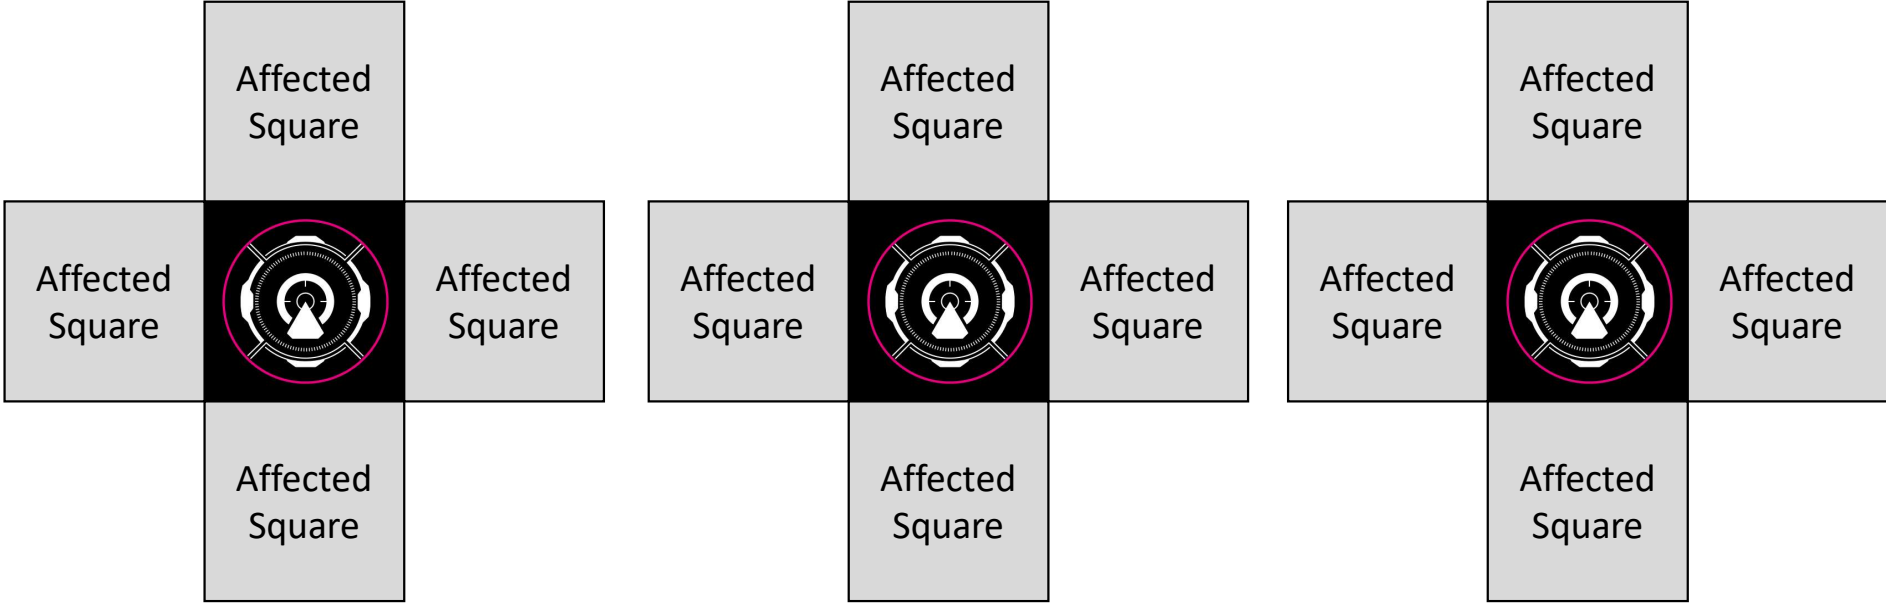

Aim/Dash Tokens

Designers Note

The Aim/Dash tokens have a green side to denote an un-used token and a used token. It is recommended that once the Aim/Dash token is used to activate the tactical ability that it be flipped to the 'used' side as a reminder (since most of the tactical abilities associated with this token have some kind of movement or shooting restriction).

Smoke Tokens

Designers Note

The Smoke Tokens affect the square they occupy and each adjacent square. These Smoke Tokens have been laid out with 'affected square' boxes for ease of visual reference.
